Laptop Version

1. Prompt Bar

Currently it looks like this:

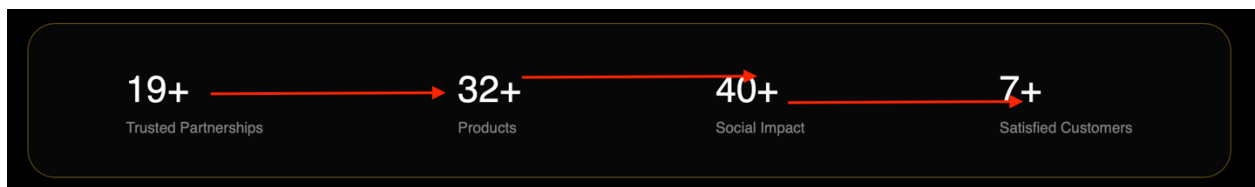

It should look like this:

2. Number Spacing

Currently the numbers are not spaced out evenly. The red arrows are all equally long but so the spacing should be adjusted. This is current:

This is how it should be:

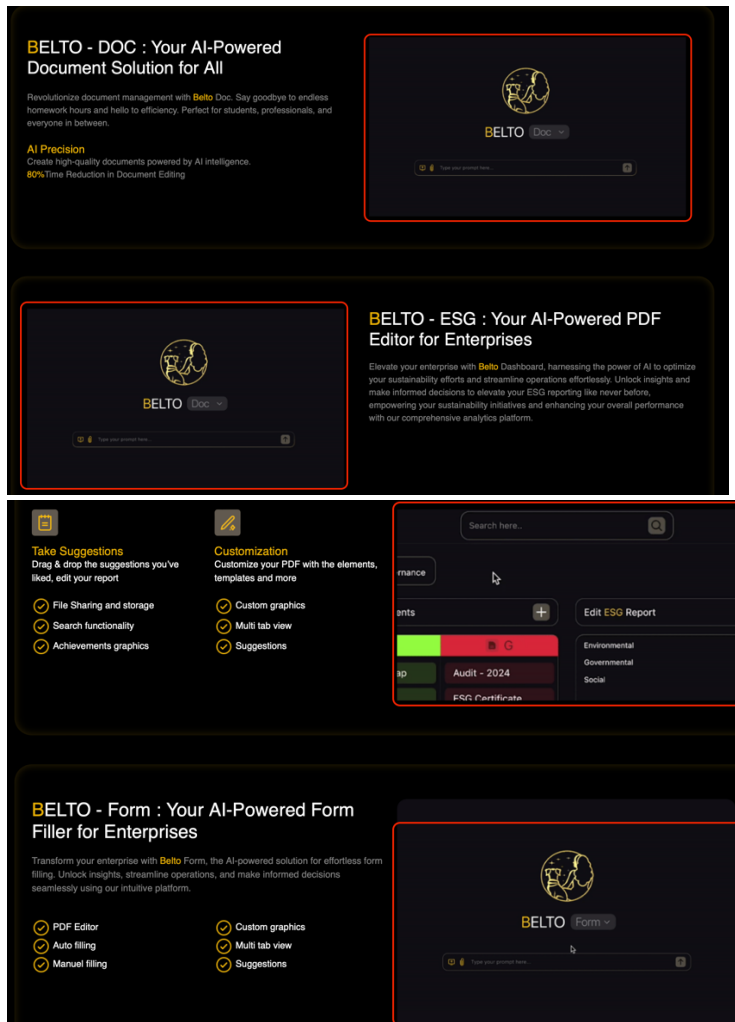

3. Every “Belto” should look like this:

(The fade you have made is perfect and should be used for every “Belto”)

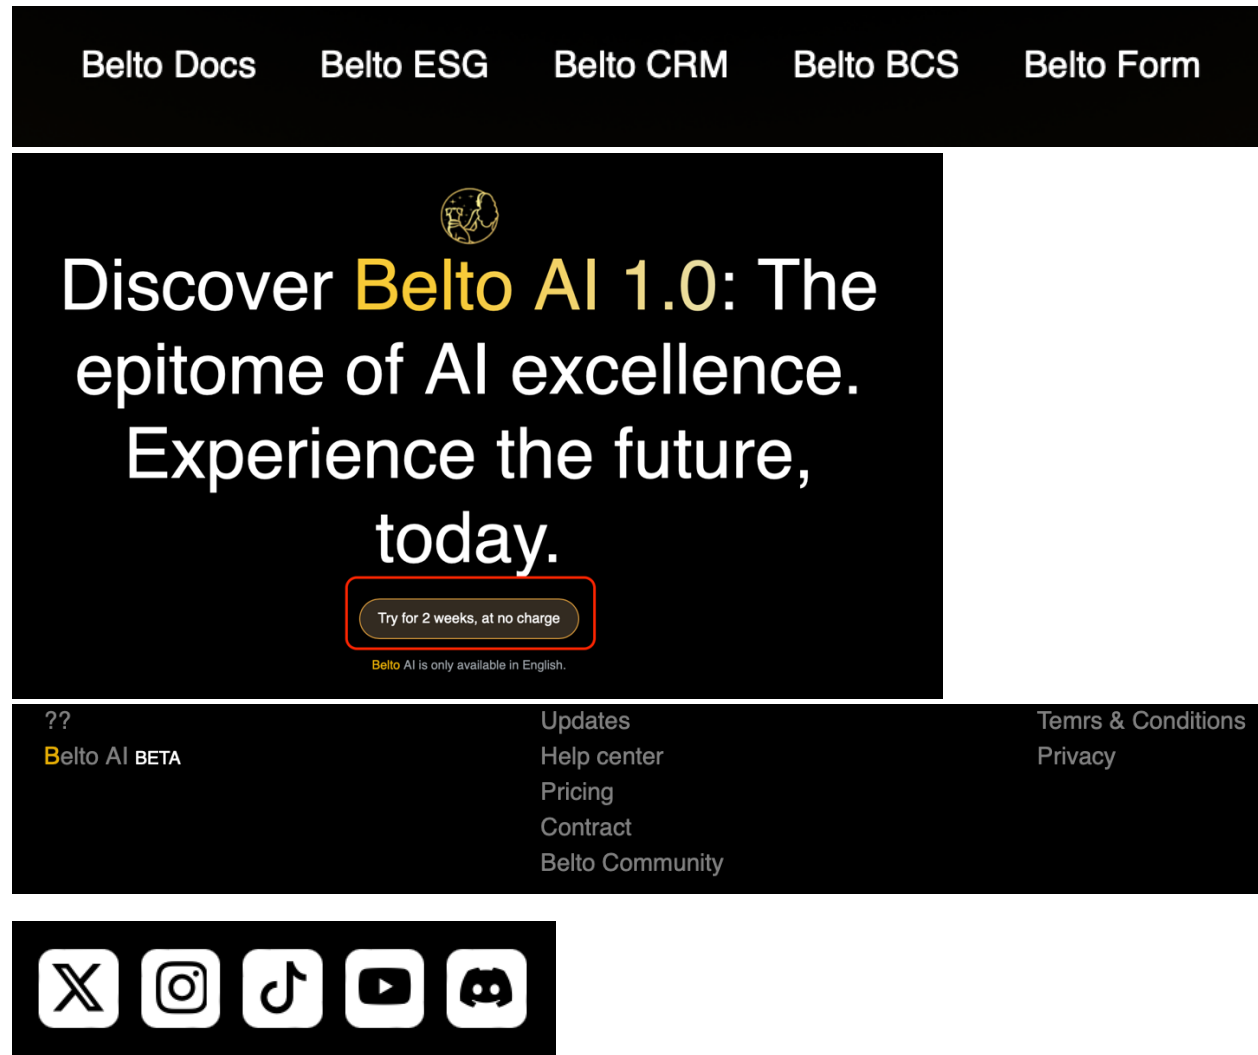

4. Animation videos

These animations have to start working once the user scrolls to them.

5. Hovering buttons

When the user hovers over any button, please make the background change but the text remain visible. These buttons are still missing:

6. Comparison Table

Please actually develop this table – so it is not a picture. It is important that it is readable, so please make the size of the text readable. For that you can remove two rows.

COMPARISON				
Capability	Benchmark Higher is better	Description	Belto AI 1.0	Other AI's <small>API numbers calculated where reported numbers were missing</small>
Response Speed	MMLU	Representation of questions in 57 subjects (incl. STEM, humanities, and others)	90.0% <small>CoT@32*</small>	86.4% <small>5-shot** (reported)</small>
Response Quality	Big-Bench Hard	Diverse set of challenging tasks requiring multi-step reasoning	83.6% <small>3-shot</small>	83.1% <small>3-shot (API)</small>
	DROP	Reading comprehension (F1 Score)	82.4 <small>Variable shots</small>	80.9 <small>3-shot (reported)</small>
	HellaSwag	Commonsense reasoning for everyday tasks	87.8% <small>10-shot*</small>	95.3% <small>10-shot* (reported)</small>
Math	GSM8K	Basic arithmetic manipulations (incl. Grade School math problems)	94.4% <small>ma*18@32</small>	92.0% <small>5-shot CoT (reported)</small>
	MATH	Challenging math problems (incl. algebra, geometry, pre-calculus, and others)	53.2% <small>4-shot</small>	52.9% <small>4-shot (API)</small>
Code	HumanEval	Python code generation	74.4% <small>0-shot (IT)*</small>	67.0% <small>0-shot* (reported)</small>
	Natural2Code	Python code generation. New held out dataset HumanEval-like, not leaked on the web	74.9% <small>0-shot</small>	73.9% <small>0-shot (API)</small>

*See the technical report for details on performance with other methodologies
**GPT-4 scores 87.29% with CoT@32—see the technical report for full comparison

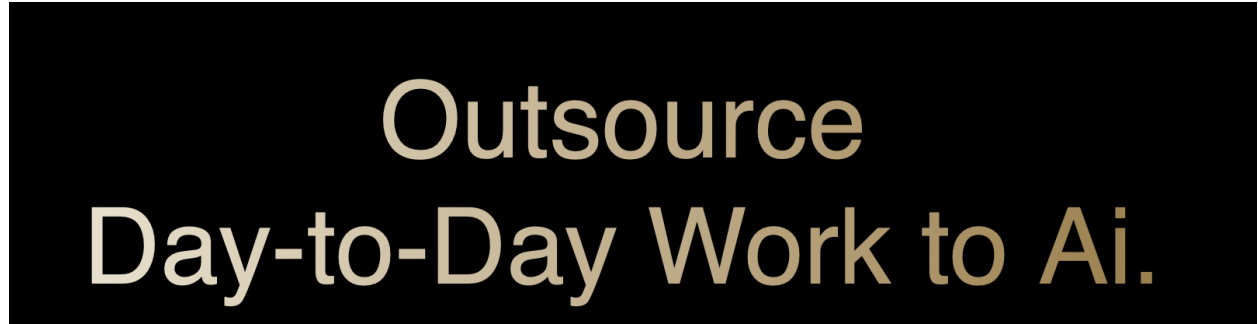

7. FAQ

They are currently missing. The animation when clicking on a question should look animate like in the following website: socket.ai

Otherwise, the FAQ can look exactly like on the Figma.

8. Color Adjustment

Please adjust the fade of the header to the same colors as the rest: Currently the color fade looks like this:

But it should have the same color as this (kind of more orange/gold – the direction of the fade is good!)

9. Partner & Feedback Animation

The animation is a bit too quick and seems a bit buggy. This video I cannot attach here to show you the bug, which is why it will be attached to the Fiverr message.

Phone version

1. Buttons Spacing

The spacing on the following buttons is off:
